

Example 1.1

Seasonality :

In general passenger numbers increase from Q1 (Jan-Mar) to Q3 (summer peak) and then decrease to Q4.

Outliers :

In 2020-2021 passenger numbers are far lower than in other years.
Variability is also lower in 2020-21.

Trend :

Variability (prior to 2020) does not appear to change much with time.

'Possible' slight downward trend in passenger numbers over time. But, this would require further investigation.
